# 2021 outlook

# Umicore set for outstanding performance in 2021

## Umicore expects adjusted EBIT for 2021 to approach € 1 billion

based on soaring precious metal prices, strong demand across businesses and robust operations. Compared to 2020, this FY outlook incorporates on a like-for-like basis an exceptional additional contribution of roughly € 250m linked to higher precious metal prices. The guidance also assumes no degradation in demand patterns in the automotive industry or, more generally, in the macro-economic environment, due for instance to the evolution of the pandemic.

### CATALYSIS

Adjusted EBIT expected to more than double from € 154m in 2020:

- Market share gains in gasoline applications for LDV in China and Europe
- Very favorable platform mix and benefit from continued decline of diesel cars in Europe
- Savings from footprint adjustments and cost improvements carried out in 2020
- Strong demand in PMC and FCS and higher PGM prices

### ENERGY & SURFACE TECHNOLOGIES

Adjusted EBIT meaningfully up<sup>1</sup> YoY to slightly exceed the February guidance of € 115m:

- Substantial growth in cathode materials for EVs (especially in Europe) and improving mix, more than compensating pricing pressure in China and € 50m fixed costs increase
- Strong demand in EOM, CSM, MDS

### RECYCLING

Adjusted EBIT very substantially above € 362m of 2020:

- Exceptionally high metal prices
- Strong growth across business units and regions
- Excellent supply mix
- High contribution from trading
